

# OMG

OMG is a heavily coated desiccant powder with chemically indifferent Hydrocarbon which reduces the air pollution and adds to the ease in handling. Heavy coating also prevents the direct interference of humidity with the material lying in idle condition. The material reacts with the moisture once it is introduced in the system thus enhancing the properties of the end product.

OMG can be used in Carpet Back Layers, PU Systems, PVC Plastisols, Vulcanizations of Rubber.

<u>Description</u>	<u>Unit</u>
Appearance : Off White	
Oil Absorption : $12 \pm 2$	
Storage Stability : In packed & sealed conditions 6 months maximum	
Bulk Density : $0.85 \pm 0.5$	$\text{g/m}^3$
Loose Approx 3.3	[specific]
Residue of 500 mesh : Max. 0.5	%
** OMG also available in noodle form	
Packing : 1 Kg Pkt/ [Net Weight] 10/25 Kg in Bags	Kg
